Professional Classic™ Point-of-Use electric water heaters feature a space-saving design for installation in limited spaces

**Efficiency**
- .93 EF for 30-gallon model
- Single resettable stainless steel heating element to prolong anode rod and tank life

**Features**
- High efficiency heating element
- Over-temperature protector cuts off power in excess temperature situations
- Automatic thermostat keeps water at desired temperature
- Wall bracket for easy wall mount installations and corrosion resistant 1/4 turn drain valve included with 2.5 gallon model

**Plus…**
- Temperature and pressure relief valve
- Exclusive Rheemglas® tank lining resists corrosion and prolongs tank life
- Meets or exceeds National Appliance Energy Conservation Act (NAECA) requirements
- These units are U.L. listed and comply with Underwriter’s Laboratories Specifications 174
- Enhanced-flow brass drain valve on 2.5-gallon model
- Low lead compliant

**Energy Factor** based on D.O.E. (Department of Energy) test procedures.

**Warranty**
- 6-Year limited tank and parts warranty.*

*See Residential Warranty Certificate for complete information

Units meet or exceed ANSI requirements and have been tested according to D.O.E. procedures. Units meet or exceed the energy efficiency requirements of NAECA, ASHRAE standard 90, ICC Code and all state energy efficiency performance criteria.

### Professional Classic Point-of-Use

- **2.5, 6, 10, 15, 19.9 and 30-Gallon Capacities**
- **120 Volt AC**
- 2-Wire Single Phase Electric

Energy Factor based on D.O.E. (Department of Energy) test procedures.

For double element, substitute “2” suffix for “1”. Not available in 120 volt. Available with 2-wire (single phase) outlet only. (8000 watt max.).

- 2.5 gallon model: 1/2" N.P.T. inlet and outlet. Relief valve connection 3/4".
- 6 through 30 gallon models: 3/4" N.P.T. outlet, inlet, anode rod, T & P valve connections. Not available with 3 phase wiring.
- 6 through 30 gallon models: 3/4" N.P.T. outlet, inlet, anode rod, T & P valve connections. Not available with 3 phase wiring.

**CONSTRUCTION DETAILS:** The cold water enters the tank a few inches from the bottom. Both hot and cold water lines may be connected directly to the water heater without special nipples or tees. The relief valve simply screws into the opening provided.

*In keeping with its policy of continuous progress and product improvement, Rheem reserves the right to make changes without notice.*
