Series 100DT

Drain Tubes

Size: 3/4" (20mm)

Series 100DT Drain Tubes are used to easily provide a safe discharge line from residential water heater temperature and pressure relief valves. No special tools, fittings or sealants are required to install these drain tubes, they are simply hand-tightened to the T&P valve discharge.

Series 100DT Drain Tubes can be used on gas, electric or oil fired water heaters to safely drain water discharged from the heater's temperature & pressure relief valve.

Features

- Models available for both side and top mounted T&P relief valves
- No special tools required to install, simply hand-tightened
- Can be used on gas, electric or oil fired water heaters
- UPC and IAPMO listed, ASME A112.4.1 approved
- Meets Department of Housing and Urban Development requirements

Pressure – Temperature

Maximum Operating Temperature: 250°F (121°C)

Maximum Working Pressure: 15psi (103.35 kPa)
