

**An important part of an effective
Fuel Tank Maintenance Program**

SBG

FUEL SLUDGE REMOVER

SBG is a powerful blend of sludge and water removing compounds. SBG is the most effective way to eliminate sludge, dirt and water from storage tanks. Unlike other fuel sludge removers, SBG will dissolve fuel impurities and convert them into a combustible substance that will not clog nozzles or injectors while assuring clean filters and strainers.

SBG works in all types of fuel including Fuel Oil, Diesel Fuel, Kerosene, Bunker Fuels and Gasoline.

We recommend using SBG with every fuel delivery. Results are best if SBG is added prior to filling.

*SBG is the most
cost-effective way to
prevent the buildup of
sludge and sludge related
impurities in your fuel!*

FPPF CHEMICAL COMPANY, INC.

Made in the USA

SBG FUEL SLUDGE REMOVER

Product Data Sheet

- Dissolves sludge, dirt and other contaminants
- Prevents nozzle clogging
- Keeps filters clean longer
- Converts fuel impurities to safe combustible fuel
- Improves atomization of fuel
- Works in all types of fuel

Directions:

Use one quart of SBG for every 1000 gallons of fuel. If fuel is already contaminated, use one quart for 300 gallons of fuel.

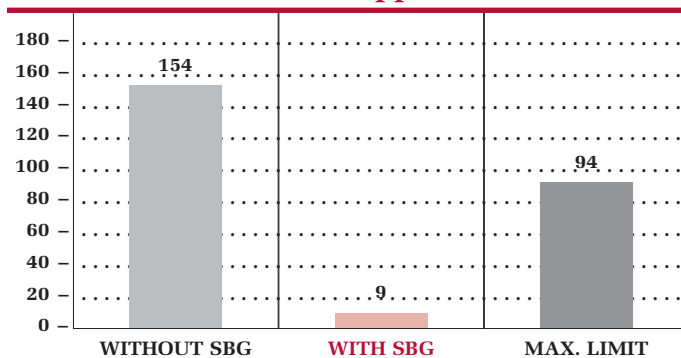

Results are best if SBG is added prior to filling.

Packaging:

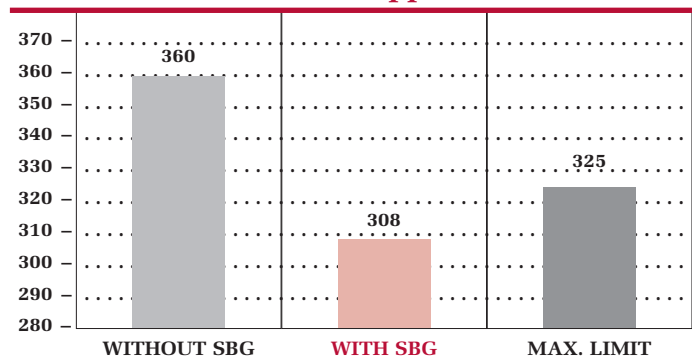

Product #	Qty/Case
00342	12/32 oz.
00359	1/5 gal.
00360	1/55 gal.

SBG greatly improves fuel emissions. Recent test results using SBG in Heavy Oil Fuels are as follows:

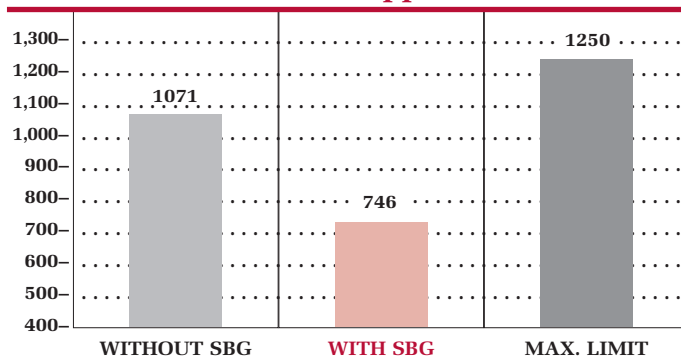

CO ppm

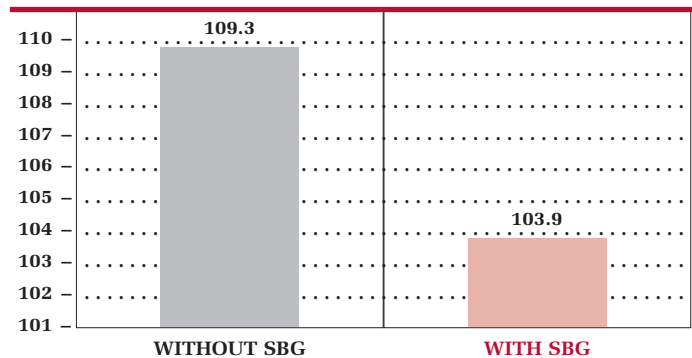

NOx ppm

SO2 ppm

FUEL CONSUMPTION

SATISFACTION GUARANTEED OR YOUR MONEY BACK.
