### Product description

The second stage regulator reduces the pressure (10-5 psi) coming from a first stage regulator directly to the inlet pressure (11" W.C.) of the user appliance. Therefore Type 998 LP regulators are designed for Type A installations, see page 6 of the present catalogue. They have to be used outdoors in correct mounting position with venthole turned downwards. In the standard version these regulators are delivered with vent-hole in line with the inlet fitting. But there are three other configurations of the inlet and outlet fittings for the Type 998 LP model:

- Back Mount 998 LP-03, 998 LP-04 and 998LP-29
- Angle Body 998 LP-05
- In line inlet and outlet Flange 998 LP-09 and 998LP-10
