

MULTI ZONE HEADER SYSTEMS

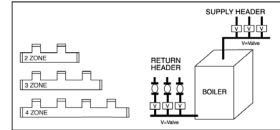

Basco

2Z, 3Z, 4Z Series Multi-Zone Header Systems

Prefabricated hydronic header system for multi-zone heating installations. Can be installed as a supply or return header.

FEATURES:

- Available for 2, 3 or 4 zone applications.
- One piece construction saves time and money, while providing a more professional, finished appearance.
- Eliminates the possibility of leaks.
- One unit can be used for supply or return installation.
- Headers have future expansion capability. Additional zones can be installed at the end of the header.
- Headers are constructed of 1-1/4" SCH 40 pipe.
- Plastic caps are installed to protect all pipe threads.
