The Smart Oil Gauge™

The **Smart Oil Gauge** is the first connected home device of its kind that allows you to remotely monitor your home heating oil tank. The Smart Oil Gauge uses an ultrasonic sensor to measure the level of oil in the tank throughout the day, and transmits this information over your home's Wi-Fi network. Check your tank level from any smartphone, tablet or PC – anywhere in the world. When the tank is low, the device will send text and e-mail alerts indicating that it's time to order oil.

Features & Benefits:

- 💧 **Remote Monitoring:** Check your tank from your phone - anytime, anywhere. Works with iOS and Android devices, as well as any laptop or PC.
- 💧 **Low-Level Alerts:** Receive text and e-mail alerts when the tank is getting low and it's time to order oil.
- 💧 **Energy-Efficiency:** Track your oil consumption to see how much fuel you save by lowering the thermostat a degree or two.
- 💧 **Replaceable Batteries:** Lithium batteries can last several years; plus, the device will tell you when it's time to replace them.

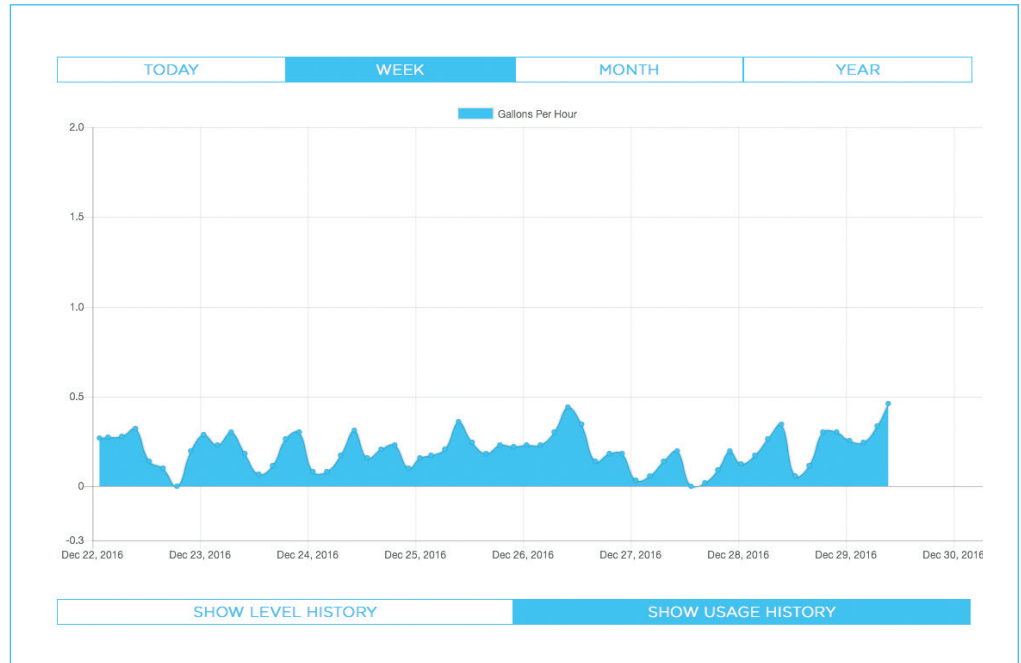

*Battery life depends on upload settings and Wi-Fi signal strength.
