Condensate Drain Pans

When a mini-split system operates in heat pump mode, the outdoor coil becomes the evaporator coil. Typically, condensation generates from the evaporator coil. In certain installations, the condenser coil may be mounted overhead on brackets affixed to a wall. In these overhead applications, dripping condensation may be a nuisance. Condensate drain pans bolt onto the condenser mounting brackets, and the drain line can be plumbed to a nearby drain location. Furnished complete with all mounting hardware and drain pan outlet, condensate drain pans are available in either plastic or powder coated steel.

Smooth Drain for Ductless Systems

The Asurity™ Smooth Drain Line, 230-DL16-S for ductless systems is a unique non-kinking drain line for mini-split units, with a smooth internal surface. The smooth internal surface minimizes trapped water that can promote biological growth, minimizing the possibility of blockages and foul odor formation. This 16mm diameter drain line is used for mini-split installations. Available in 98 feet lengths.
