⁴Based on standard test procedures prescribed by the United States Department of Energy.

⁵Net AHRI ratings are based on net installed radiation of sufficient quantity for the requirements of the building and nothing needs to be added for normal piping and pick-up. Water ratings are based on a piping and pick-up allowance of 1.15, steam ratings on an allowance of 1.333. An additional allowance should be made for unusual piping and pick-up loads.
