The internal seal enables each fitting to seal on scratched pipe. A seal is maintained on the smooth inside surface of the polyethylene pipe, regardless of the exterior surface of the piping. This improved seal protection creates the ultimate design for mechanical joints.

Each Con-Stab fitting provides the following unique features:

- Two internal seals
- Fixed stiffener
- Self-locking gripper
- Moisture lip
- Uni-body construction

The Con-Stab I.D. Seal® fittings provide the user with the following advantages:

- Cost effective joining method
- Simple assembly
- No additional assembly equipment required, for installation (just chamfer pipe and push)
- Expanded product line with various configurations and material options (PE 2406 or PE 3408)
- Uni-body design eliminating all external parts
- Meets or exceeds all D.O.T. and ASTM requirements
