

## Non-Slip Manual Tie Tensioning Flex Duct Tools

*Flex Duct Tools Tighten nylon cable ties to fiberglass duct take off connections faster, easier, and with better quality than by hand.*

Malco's TY4 and TY4G (*Vinyl Gripped*) Cable Tie Tensioning Tools feature a manual, easy to operate, cutting mechanism and comfortable gray vinyl cushioned grips. When the tie is tight, a simple pull of the lower handle causes a blade to engage and cut off the excess tail of the nylon tie. A reduced

pinch point handle closing ensures peace of mind and reduces injury. Malco Tie Tools are designed to work on standard 175 lb. ties as well as thinner 125 lb. ties.

## Adjustable Tie Tensioning Flex Duct Tool

*Designed for heavy users of nylon cable ties, that features a desired tension adjustment knob.*

Malco's TY6 Tie Tensioning Tool is designed for heavy users of nylon cable ties, and is a more efficient, higher quality alternative to installing flexible duct to take offs. The TY6 features an adjustment knob that allows an installer to set a desired tension for securing flex duct to a take-off collar. When the

tie is tight, a breakaway spring mechanism releases the tool's lower handle, which causes a blade to engage and automatically cut off the excess tail of the nylon tie. No extra operation for manual trimming is required. Operating Malco's TY6 Tie Tensioning Tool is also easy on the installer. Contoured handles, with stops, are easier to grasp. Furthermore, the smooth lever action and vinyl cushion grips minimize hand and arm fatigue on big jobs.

*Tensioning adjustment knob and automatic cut-off mechanism turn adjustment knob clockwise to increase tension and counter clockwise to decrease tension.*

**CAUTION:** Do not over tighten adjustment knob with fingers. Adjust knob only with fingers to avoid breaking ties before cut-off occurs.

### Specifications

Flex Duct Tie Tools			
Catalog Number	Description	Length in. (mm)	Net Wt. oz. (g)
TY6	High Leverage Flex Duct Tie Tool	8-1/2 (216)	15 (425)
